

High Temp Stainless Steel Data Logger

- Extended temperature range: -40°F to 302°F (-40°C to 150°C)
- Rugged, submersible and battery powered
- 2" rigid external probe with fast response time, ensuring accurate temperature readings
- Storage medium providing maximum data security even if the battery becomes discharged
- Programmable start time
- Reusable
- N.I.S.T. traceable

Model 20615

Applications:

Hostile environment monitoring, retort sterilization, autoclave validation, food processing and preparation, HACCP programs, flash freezing and chill blast tunnel for prepared and processed foods.

Temperature Range	-40°F to 302°F (-40°C to 150°C)
Sensor	100Ω Platinum RTD
Temperature Resolution	0.05°C
Accuracy	±0.5°C
Reading Interval	1 reading every 2 seconds to 1 every 12 hours
Data Format	Date and time stamped °F, °C K, °R
Calibration	Digital calibration through software
Battery	3.9V high-temperature lithium battery included, 1 year typical life
Body Dimensions	1.1" x 1.75" dia. (28mm x 45 mm dia)
Probe Dimensions	2.0" x 3/16" dia (51mm x 5 mm dia)
Weight	8 oz (225 grams)
Material	316 Stainless steel
Certification	CE mark
